

# Protect your ministry

Insurance Board provides peace of mind when you have a loss — now we can help you avoid it.

Imagine finding a **pipe burst** when you walk into your building. Maybe a bathroom flooded or a hot water heater leaked. In addition to addressing water damage, now you are faced with the overwhelming task of cleanup during a pandemic.

Instead, **imagine** you received a text or email **alert** telling you there was an issue **before** significant damage occurred.

Insurance Board has partnered with Sensor Solutions by HSB™ to offer you a valuable **early warning system** that uses the latest **sensor technology**. This technology will detect water and monitor indoor temperatures that may help avoid a disruptive impact on your ministry.

**Insurance Board and Sensor Solutions by HSB are offering you an early warning sensor system that detects water and monitors room temperature at a special, low monthly rate.**

**Your system features:**

- Equipment, monitoring, and support
- Sensors designed to monitor room temperature and detect water through a cellular network, no Wi-Fi needed
- Account management and access to sensor readings via the mobile app, Meshify Protect™ and/or an online portal
- Alerts sent through SMS text, email, and/or phone call
- Ability to add multiple contacts to receive alerts
- 24/7 monitoring by a staffed Sensor Support team

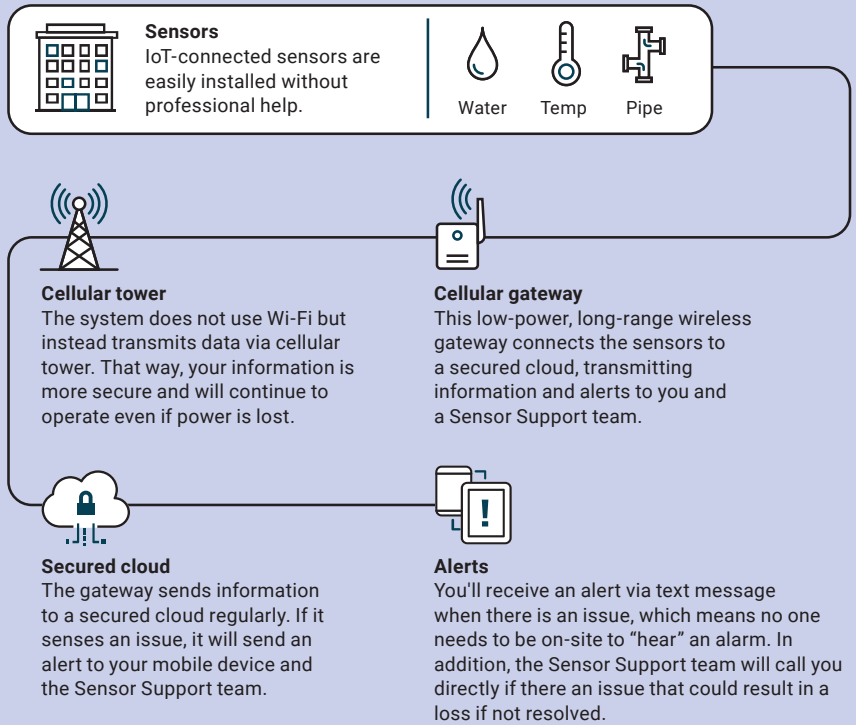

# Three easy steps to put sensor technology to work for your ministry

- 1 SIGN UP TODAY.** Speak with your Insurance Board agent or visit [sensorsignup.com/ib-insured-water-sensors](https://sensorsignup.com/ib-insured-water-sensors).
- 2 RECEIVE YOUR SENSORS BY MAIL.** You'll receive emails with delivery status.
- 3 ACTIVATE.** Using the Meshify Protect app, activate your account and sensors in less than 30 minutes.

## How Sensor Solutions by HSB™ works

Sensor Solutions by HSB can help avoid or reduce the damage to your building by detecting water leaks and changes in temperature or humidity, and then sending an alert so you can fix the problem.
