FloLogic for Insurance Board Policy Holders

Plumbing supply leaks are a leading cause of damage and disruption to properties and facilities. FloLogic is a premium smart leak control device that detects and automatically stops plumbing supply leaks to prevent catastrophic water damage.

How FloLogic Works

Intelligently protects the entire building, automatically stopping leaks, no matter their location, beginning as small as a pinhole.

Provides alerts and enables app-based control of the property's water supply.

Installed on the incoming water supply to monitor all water flow.

Each FloLogic System comes complete with:

- Valve Assembly
- Power Supply
- Backup Battery
- Communication Cable
- Gateway Module
- Connect Module

Available in 1", 1.5", and 2" valve sizes featuring U.S.- made cast bronze, with our best-in-class 5-year limited warranty.

Each FloLogic System comes complete with:

Insurance Board insureds receive 15% off the list price by entering the coupon code **INSBOARD15** at www.flologic.com or by calling FloLogic at **877-356-5644** to identify as a policyholder.

- Your local plumber can install FloLogic, and FloLogic can provide referrals.
- Call or visit FloLogic to order or learn more about protecting your ministry.

*Pricing subject to updates, discount percentage will remain 15%

Remote & Auto Water Shut-Off

Remote and automatic water shut-off protects your ministry from significant leak damage via its automatic water shut-off valve.

Access to Water Use Data

See real-time and historical water data to diagnose leaks and save hundreds on your water bill.

Text & Email Alerts

Direct Alerts to your phone when you surpass the thresholds set, leading to a water leak.

User Configurable

All settings and thresholds are easily adjusted over the web to protect your ministry.

Accessible Worldwide

Web-based platform, accessible through any browser on a desktop, laptop, or smartphone anywhere in the world.

Temperature Sensor Monitoring & Alerts

Protects from temperatures that could lead to a burst pipe from freezing, with text/ email alerts.

Whole Ministry System

Our water monitoring system will track flow to protect your entire ministry; sensors protect only the locations where they are placed from leaks.

Total User Controlled

Leak alerts and our automatic water shut-off are user-configurable to minimize false positives and provide the best level of protection.

Reliable Components

Brass utility-grade plumbing components, which we made "smart" with our electronics. The modular design optimizes field serviceability.

Easy Installation

Installation by a licensed plumber typically takes one hour or less.

Battery Backup

Use the battery and local processing to protect your ministry when it is most vulnerable, such as during a power outage.

Moen for Insurance Board Policy Holders

- **Automatic Shutoff:** With FloSense Technology, the device learns your home's water usage patterns to identify abnormalities like running water or small leaks and will automatically turn off water to prevent damage.
- **Real-Time Notifications:** The device monitors your home's water, sending you app, phone call and email alerts for potential leaks whether you're at home or away.
- **App-Based Control:** Proactively control your water from anywhere using the Smart Water App for added protection.
- **Runs daily microleak tests** to ensure your home's plumbing network runs efficiently while identifying leaks as small as a single drop per minute.
- **Moen Smart Water App** provides a view of your home's water usage and history, flow rate, and pressure with the ability to turn the water on or off remotely. The app is free, with no fees or subscriptions required.
- The device is installed in line with your indoor or outdoor water line and requires Wi-Fi and a nearby AC power outlet.
- 900-006 model is compatible with 1 inch or smaller pipe diameter.
- Professional installation by a licensed plumber is recommended. Need help with installation. [Find a Pro today!](#)
- The device can track water usage by type; each fixture in your home has a unique usage pattern, and the system will monitor them so you can track how and where you use the most water in your home.
- Internal sensors monitor the actual water moving throughout your home and distinguish between typical water usage and a leak or burst pipe, unlike competitive products that use ultrasound technology to listen to the water.
- Get alerts when the system detects freezing conditions so you can take action.
- Works with Amazon Alexa, Ring, Alarm.com and NICE.

***Designed for Residential
or Small Churches**
